Computer Networking Project
This Project Demonstrates How DNS Resolution, IP Addressing, And HTTP/HTTPS Communication Allow Websites To Be Hosted And Accessed On The Public Internet.
Team Members: Your Name
Networking Concepts
DNS
DNS Translates Domain Names Into IP Addresses So Browsers Know Which Server To Contact.
IP Addressing
Every Device On The Internet Has An IP Address That Uniquely Identifies It On The Network.
HTTP Vs HTTPS
HTTP Transfers Web Data, While HTTPS Encrypts Communication Using TLS To Improve Security.
TCP/IP
The TCP/IP Protocol Suite Manages Reliable Data Communication Across Networks.
Our Website Is Hosted Publicly, DNS Resolves The Domain To An IP Address, And Communication Occurs Over HTTPS Using TCP/IP.
About This Project
This Website Was Created For A Networking Course To Demonstrate How A Site Can Be Hosted Publicly And Accessed Through Standard Internet Protocols.
